

AMENDMENTS, INCLUDING STATUS OF ALL CLAIMS

In the Claims:

Please replace pending Claims 1, 3, 10, 11, and 13 with amended Claims 1, 3, 10, 11 and 13, and cancel Claims 21-22, as follows:

1. (Presently Amended) A container, said container comprising:
a first fillable member with a first fill aperture; and
a second fillable member with a second fill aperture, said second fillable member disposed within said first fillable member, wherein said second fillable member defines a three-dimensional design, wherein said container has a first dispensing end and a second base end and said first fill aperture and said second fill aperture are each defined proximate said first dispensing end, and wherein the dispensability of the contents of either fillable member is independent of the status of the contents of the other fillable member.

2. (Original) The container of claim 1, wherein each said fillable member of said container further comprises a neck member and a vessel member, and wherein said vessel member of said second fillable member is carried substantially within said vessel member of said first fillable member.

3. (Presently Amended) The container of claim 2, ~~further~~

~~comprising a fill aperture,~~ wherein said neck member of said first fillable member defines said first fill aperture and said neck member of said second fillable member defines said second fill aperture.

4. (Original) The container of claim 1, wherein said first fillable member is of a generally transparent nature and said design of said second fillable member is visible from the exterior of said first fillable member.

5. (Original) The container of claim 1, wherein said first fillable member is formed from a solid material, said solid material selected from a group consisting of transparent material, translucent material, or a combination thereof.

6. (Original) The container of claim 1, wherein said second fillable member shares at least one wall with said first fillable member.

7. (Original) The container of claim 1, wherein said design of said second fillable member is selected from a group consisting of an animal, a mascot, a logo, an emblem, block-letters, or a combination thereof.

8. (Original) The container of claim 1, wherein said design of said second fillable member is defined by a contoured surface.

9. (Original) The container of claim 1, wherein said design of said second fillable member is defined by a substantially smooth, imprinted surface.

10. (Presently Amended) The container of claim 3, further comprising a lid, said lid dimensioned to removably seal said fill apertures.

11. (Presently Amended) A container, said container comprising:
a first fillable member; and

a second fillable member, said second fillable member disposed within said first fillable member, wherein said second fillable member is visible from the exterior of said first fillable member, and wherein liquid held within said first fillable member and liquid held within said second fillable member are each selectively accessible via a first end of said container.

12. (Original) The container of claim 11, wherein each said fillable member of said container further comprises a neck member and a vessel member, and wherein said vessel member of said fillable member is carried substantially within said vessel member of said first fillable member.

13. (Presently Amended) The container of claim 12, further comprising a fill aperture, wherein said neck member of said first fillable member and said neck member of said second fillable member

define said fill aperture proximate said first end of said container.

14. (Original) The container of claim 11, wherein said second fillable member defines a three-dimensional design.

15. (Original) The container of claim 11, wherein said first fillable member is formed from a solid material, said solid material selected from a group consisting of transparent material, translucent material, or a combination thereof.

16. (Original) The container of claim 11, wherein said second fillable member shares at least one wall with said first fillable member.

17. (Original) The container of claim 14, wherein said design of said second fillable member is selected from a group consisting of an animal, a mascot, a logo, an emblem, block-letters, or a combination thereof.

18. (Original) The container of claim 14, wherein said design of said second fillable member is defined by a contoured surface.

19. (Original) The container of claim 14, wherein said design of said second fillable member is defined by a substantially smooth, imprinted surface.

20. (Original) The container of claim 13, further comprising a lid, said lid dimensioned to removably seal said fill aperture.

21. (Cancel) A method for holding a plurality of beverages within one container, said method comprising the steps of:

(a) obtaining a multiple-vessel container comprising a lid, a first vessel, and a second vessel, said second vessel defining a three-dimensional design;

(b) filling said first vessel with a first beverage;

(c) filling said second vessel with a second beverage;

(d) closing said container via said lid.

22. (Cancel) The method of claim 21, wherein said second vessel of said multiple-vessel container is positioned within said first vessel.
